

Want to increase your inter-office security *and* reduce your telco costs? Use **Cybersource/VPN**

Australia's Best Value VPN/Firewall Solutions

If you need to connect two or more offices using low-cost Internet connections, rather than expensive leased lines, Frame or ISDN, then consider using a Cybersource/VPN. The Cybersource/VPN solution is a hardware/software appliance, rack-mounted for your convenience. It provides firewalling, masquerading, (and optional DHCP, DNS, Web Proxy) in a modern x86-based unit. The Cybersource/VPN uses standards-based technologies, and is easily integrated into your TCP/IP data-network. Cybersource also provides very affordable managed services for our equipment, ensuring that all necessary security and systems patches are in place, and your network is healthy and safe. **Contact Cybersource today for more information.**
