

Your Organisation on a Perpetual and Costly Upgrade Treadmill?

Is Microsoft Licencing Making You Sweat?

We Have The Way Off.

For years, you have been deploying your business applications on Microsoft's platforms. Simply because you felt you had no alternative.

Relying too heavily on Microsoft can become a serious problem for you. They can turn the treadmill heat up on you whenever they want. Leaving you to run the costly software licence Marathon.

We have the way off the Microsoft treadmill, and can help you. Linux and Open Source technologies together offer you a true alternative to the cost and complexity of desktop and server environments running on Windows.

By adopting technologies like Linux, BSD, Apache, OpenOffice.org, PHP, Zope, MySQL, PostgreSQL, Perl, Python, Mozilla, KDE, Gnome, Evolution, VNC, Samba, CVS and many more, you will discover *best-of-breed* business software which offers you, for the first time, a long-term viable, open, secure, robust and powerful alternative to the status-quo.

Learn more about how Linux and Open Source can improve your server and desktop environment. Contact Cybersource. info@cyber.com.au or call +61 3 9621 2377

Why is Microsoft raising prices on you? Because they *can*!
To take that power away from them, use *Linux*!

If you think this parody is a takeoff of another advertisement you may have seen in the trade press, you are indeed correct. We at Cybersource believe that one good joke deserves another. If you agree, please print this poster out, and pass it on to others. Remember, you can either print it out full size (A1) or scale it down to whatever size printer you have available.
